- ❖ Disaster Management
- ❖ IT Assets Management

WASTE MANAGEMENT

Smart city ERP solution facilitates the collection of solid waste through sensor fitted waste containers enabling disposal and tracking of solid waste.

FINANCIAL ACCOUNTING MANAGEMENT SYSTEM

Smart city ERP software manages finance and accounting with features such as auto-payment requisition, auto BRS (bank reconciliation statement) by uploading the bank statement into the ERP software, expenditure management, book-keeping, and budgeting.

HR & PAYROLL MANAGEMENT

Daily attendance of workers with location tracking, complete recruitment process management, payroll management with statutory compliance are all covered in the Smart City ERP software.

HEALTHCARE MANAGEMENT

AI-based ERP software Smart Cities provide access to the current medical condition of patients, automation in the analysis of medical tests, and assistance with medical consultation.

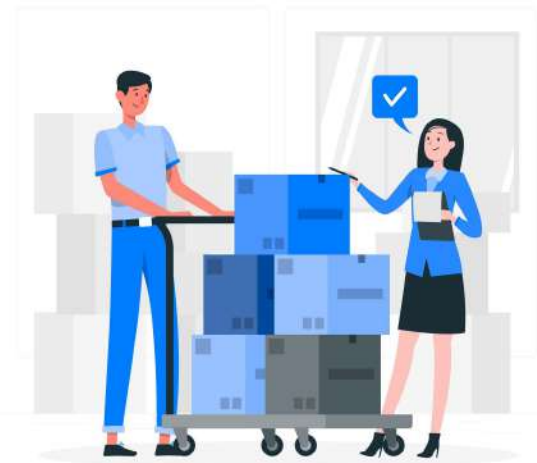

LAND AND ESTATE MANAGEMENT

Automate and ease processes such as land acquisition, rent collection, allotment of property, administration & planning, and inspection. Facilitate agility and transparency with StrategicERP Smart City software which is designed to run fast-track development projects with end-to-end monitoring and tracking capabilities.

INVENTORY MANAGEMENT

The inventory management module offers improved inventory reports, stock ledger, inventory forecasting, tracking of medical, electrical, and general stock across multiple warehouses.

SECRETARY MANAGEMENT

The Secretarial Management module streamlines secretarial practices such as preparation of agenda, creation of resolution, setting reminders for upcoming meetings, compliances and minutes of meetings.

BIRTH AND DEATH CERTIFICATE MANAGEMENT

This module covers services such as the automatic generation of issue, re-issue, and registration of birth and death certificates.

AUDIT MANAGEMENT

StrategicERP maintains the corporate information repositories of the smart city and generates auditing reports as and when needed.

HAWKERS & LICENSE MANAGEMENT

Smart City ERP automates the processing of legal licenses for vendors and hawkers. It ensures the legal recognition of hawkers in a smart city in compliance with the Street Vendors Act.

DIGITAL DASHBOARD

StrategicERP offers a centralized platform for a comprehensive view of multiple aspects such as financial information, secretarial data, auditing reports, inventory reports, status of internal IT assets, and more.

WEB PORTAL PLATFORM

Smart City ERP software acts as a platform for citizens for various needs such as Grievance/ Complaint Management, Sanitation services, Incidence Reporting, and more. StrategicERP software strengthens mobility through a mobile app, allowing citizens to avail services anytime, anywhere.

LEGAL CASES MANAGEMENT

ERP software for Smart City takes care of legal cases in an organized manner. It handles and manages legal affairs & documents in digital form, providing a handy way to access information swiftly.

FIRE PROTECTION MANAGEMENT

Smart City ERP keeps track of all your tools on a single system and sends you a reminder for regular inspection and maintenance of your fire safety equipment. ERP, developed with machine learning technology also sends out early warnings in an unfortunate event of a fire.

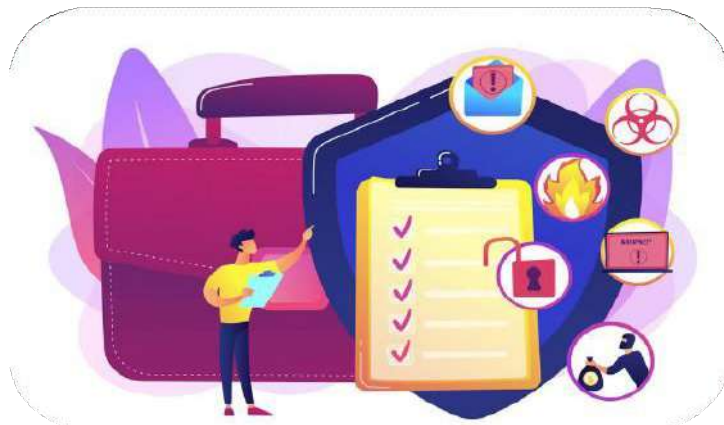

VEHICLE MAINTENANCE

Smart City ERP software keeps track of vehicle condition and carries out the processing of general maintenance and preventive maintenance. Integrated with vehicle maintenance, it reminds you to replace automobile components before they fail.

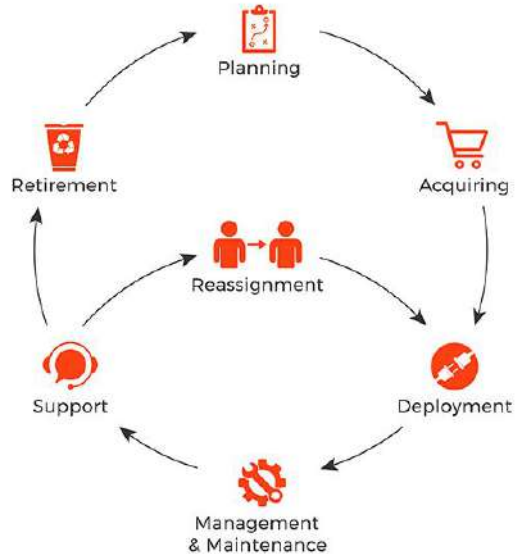

DISASTER MANAGEMENT

Smart City software solution helps with faster response and communication to citizens during emergencies such as earthquake, flood, and tsunami.

IT ASSETS MANAGEMENT

Smart city software facilitates IT inventory management that stores the hardware and software inventory information, which enables the management team to make faster decisions about purchases and repairs.

BENEFITS OF CLOUD-BASED ERP

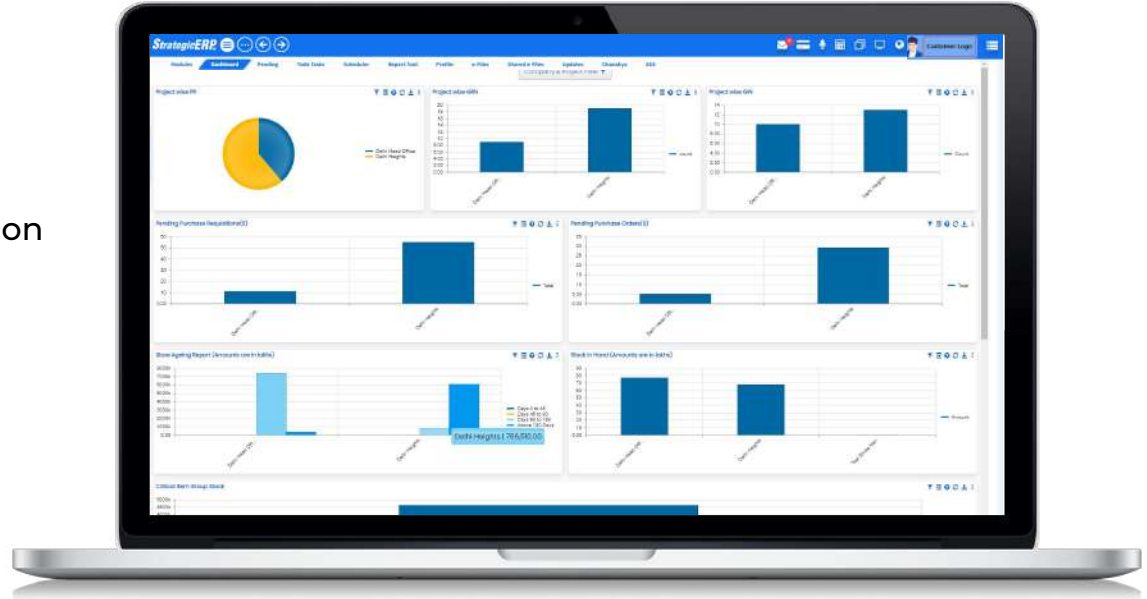

1. Faster Implementation
2. Smaller Investment
3. Enhanced Security
4. Scalable Solution
